Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-30 are presented for examination.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 11, and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. In the preamble of claims 1, 11, and 21, the preamble recites "replication", however there is no replication of data nor is there any replication steps having replicating functional steps being presented within the body (embodiment) of the claim structure.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Donoho et al., (Patent No. 7346655 filed February 21, 2002, hereinafter Donoho).

7. Regarding Claims 1, 11, and 21, Donoho teaches a method and apparatus for computed relevance messaging.

The method and associated system for computed relevance messaging includes:

publishing a first log reader (col. 8, lines 17-24), first messages to a plurality of queues (col. 17, lines 19-55), the first messages comprising changes for transactions extracted from a log by the first log reader (col. 7, lines 4-10); one of the queues becomes available, launching a second log reader to read and extract from the log and to publish second messages comprising changes for transactions extracted from the log by the second log reader to the unavailable queue as a catch-up queue (8, lines 17-38); and the catch-up queue becomes available and the second log reader reaches the end of the log, transferring the publishing of the second messages for the catch-up queue from the second log reader to the first log reader (col. 18, lines 1-21).

8. Claims 2, 12, and 22, Donoho teaches the first log reader launches the second log reader (col. 8, lines 17-24).

9. Claims 3, 13, and 23, Donoho teaches terminating the second log reader (col. 8, lines 17-24).

10. Claims 4, 14, and 24, Donoho teaches the first log reader and the second log reader execute separately (col. 8, lines 17-24).

11. Claims 5, 15, and 25, Donoho teaches transferring comprises re-synchronizing the second log reader and the first log reader (col. 8, lines 17-24).

12. Claims 6, 16, and 26, Donoho teaches re-synchronizing comprises sending synchronization messages between the first log reader and the second log reader (col. 8, lines 17-24).

13. Claims 7, 17, and 27, Donoho teaches sending a first synchronization message from the second log reader to the first log reader with second log reader restart information (col. 8, lines 17-24); and if the second log reader is ahead of the first log reader in reading the log based on the second log reader restart information, sending a stop message to the second log reader (col. 8, lines 17-24).

14. Claims 10, 21, and 30, Donoho teaches storing first restart information, associated with the first log reader (col. 8, lines 17-24), in persistent memory; storing second restart information (col. 8, lines 17-24), associated with the second log reader, in persistent memory; stopping the first log reader and the second log reader (col. 8, lines 17-24), first launching the first log reader based on the first restart information (col. 8, lines 17-24); and second launching the second log reader based on the second restart information (col. 8, lines 17-24).

Allowable Subject Matter

15. Claims 8, 9, 19, 20, 28, and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
